

## METHOD AND SYSTEM FOR FACILITATING MEDIATED COMMUNICATION

### Abstract of the Disclosure

5 A mediation subscriber communication device as disclosed herein is capable of  
performing a method for facilitating mediated communication. In at least one embodiment of the  
method for facilitating mediated communication, the method includes facilitating display of  
mediation information on a visual display portion of a mediation subscriber communication  
device, facilitating designation of selected mediation information via a data interface portion of  
the mediation subscriber communication device, and transmitting the selected mediation  
10 information from the mediation subscriber communication device for reception by a mediation  
system.
